Adam,

See Table 4 on pages 44-46 of attached. I believe you are suggesting the best approach is for local authorities to issue advisories based on the existing Air Quality Index (AQI) values and associated cautionary statements. This is consistent with the approach in the attached Wildfire Smoke Guidance.

Jon, your thoughts?

Craig

Jon,  
Can you take a quick look at this? My only suggestion is that they note that the local authorities have been briefed on the current status regarding the air quality. The local authorities would make advisories to the community for any recommended actions.

Thanks  
Adam
